DRIFT CAUGHT HERE AND THERE BY

"EVENING WORLD" REPORTERS.

This Man Was Not Always a " Sometimes" Caterer.

People who frequent Exchange place, in the vicinity of New street, cannot have failed to have observed an old negro, dressed in an exaggerated costume, with a great crowd of urchins gathered about him.

He is a queer old chap. His broad expanse of bosom is covered with a clean, white apron, and perched on his head a large, fourcornered baker's cap, made of white linen.

He comes down about 10 o'clock every norning. In one hand is a big tin boiler full of coffee, while the other holds a basket of food of a more solid nature.

Attached to the basket is a sign which

The "Sometimes" is in very small letters. The "Sometimes" is in very small letters. After he had fed the multitude of small boys down there, he removes to Newspaper Row, and, joining his wife, who runs a lemonade and cake stand in front of the Franklin statue, they get their "line work" in on the stomachs of the newsboys.

This old man conducts his business something similar to Mrs. Lamadrid, of the St. Andrew's Kitchens, by selling his "feed" at one cent. But there the similarity ends, for while Mrs. L. sells cheaply as an act of philanthropy, the o. m. is grasping for the cold, hard cast.

hard cash.

This aged individual has not always peddled bread and meat for a living, but at one time he and his wife conducted a laundry on Sixth avenue.

It is said that the old man was then in the habit of wearing his patrons' best white linen shirts, and that during the cheerless blasts of

winter he would carry erough underwear to "sweat a cold."

But he was always good-natured, and when a customer "kicked" against his thoughtlessness in not providing a clean shirt for Sunday, he always had a jolly remark ready to ease his patron's wrath.

Brooklyn Bridge to Figure on a Big Piece of Canvas.

Passing by the door of a studio in the Sherwood the attention of an Evening World man was caught by an enormous frame covered with canvas. The back was towards the door, so what was painted on the canvas could not be seen. But the size of it was sufficient to rivet attention. It was larger than Rosa Bonheur's picture of "The Horse Fair," at the Metropolitan, Tapping on the door two or three times the

Tapping on the door two or three times the newspaper man received no answer, those within were so interested in their work; so he stepped into the studio and around the end of the large canvas. A tall, stout man, with a bushy beard, was standing in front of the picture, and at a little distance was the artist's assistant, examining a photograph. The artist was M. Emil Renouf, whose pictures have excited a good deal of interest in New York art circles and in America generally.

May I take a look at your painting, M. Renouf?" asked the visitor.

"Certainly," answered the genial Frenchman.

The subject was the Brooklyn Bridge. The picture was entirely laid in and the general color scheme was indicated, but much remained to be done before the work is completely finished. One end of the bridge recedes away from the spectator and the structure stands out against a rich sunset sky, of the most brilliant coloring.

The picture will be hung in the Eden Musee, when it is done, and probably will excite more interest than any picture which has been exhibited there.

It is a picture—hich calls for much skill, especially when carried out on such a huge scale. M. Renouf has made numerous studies of the bridge, and has several photographs of it from different points.

"My child! My lost Lena!"
When, at length, she related her story, no doubt was left in the mind of either of the

delighted parents that she was their missing child.

He had tried to say more, but died with the words unspoken.

Although her early life had been one of cheerless toil she had grown up a good and beautiful girl, of whom her parents had reason to be proud, and they took her to their hearts and home to make amends for her previous trials by bestowing upon her all the delights it is in the power of love and wealth to give or in the hearts of fond parents to suggest.

The last words were hissed, rather than spoken, with all the intensity of extremest passion; and as the young man turned and quitted the drawing-room of Miss Hartly's elegant home, which had been the scene of his wrath, she sank down upon the sofa, too terrified to move or speak.

Florence Hartly was the petted, only daughter of a wealthy merchant, who could see no fault in anything she did, whatever others might think of her conduct; and, though she was termed a coquette, it mattered not to him, as he considered it only a manifestation of envy or spite towards one who was so much admired and sought after.

When Mark Hopeton, whose parents were residents of the same village as her own, returned home from college, she was pleased

with the stylish young student and secretly resolved that he, too, must become a victim to her fascinations. She little understood the man she had con-

She little understood the man she had con-quered and she expected to discard him as easily as she had others, but when she was forced to listen to his impassioned expres-sions of love—and then, when he discovered himself to have been the dupe of her designs, to his threatened vengeance—her cowardly heart was indeed frightened into repentance for her reprehensible conduct.

Five years went by, and in the cosy sittingroom of a handsome cottage, situated in the suburbs of the city of B---, a young mother sat in a low chair, singing soft, sweet ulla-bys to the little one she clasped so fondly in her arms.

Mrs. Elwood, formerly Miss Florence
Hartiy, had been married a trifle over two
years, and the child on whom she lavished
such affection was the result of that union.

Having waited a short time for the soporific vapor to take effect, he carefully entered the apartment, and bore the little one from her mother's bedside without disturbing her deep

Springing to her feet, she gazed, horror-stricken, around the room; and then, going to the wind, w, she saw the missing pane of rass, and a blanket that she had wrapped about the child the preceding night, lying upon the balcony.

With one long, piercing wail of anguish she tell down, uterly oblivious, for a while at least, to the depth of her sorrow.

For several weeks her life was despaired of:
but after a time she, in a measure, recovered
from the paralytic state her grief had occasioned.

Mr. Elwood did everything that fond affection could suggest for the recovery of the little Lens, but all his efforts were fruitless, and
as the years, one by one, went by, he gave
her up as lost to him forever.

Fitteen weary years of waiting had at
length elapsed, and the bereaved parents
were visiting one of the cities of the far
West, hoping to benefit thereby the health
of Mrs. Elwood, when, one summer morning,
as they were walking together in one of the

child.

She was known, she said, by the name of Florence Hopeton, and her earliest recollections were of her father—or one whom she had supposed to be her father.

He was killed in attempting to alight from a steam-car while in motion. Mark Hopeton's last word had been:

"Tell Florence she is not my child."

He had tried to say more, but died with the words unspoken.
